INDEPENDENT AUDITORS' REVIEW REPORT

Chung Hung Steel Corporation

Introduction

We have reviewed the accompanying consolidated balance sheets of Chung Hung Steel Corporation (the Corporation) and its subsidiaries as of September 30, 2021 and 2020, and the consolidated statements of comprehensive income for the three months and nine months ended September 30, 2021 and 2020, and the consolidated statements of changes in equity and of cash flows for the nine months ended September 30, 2021 and 2020, and the notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the consolidated financial statements). Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission (FSC) of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

We conducted our reviews in accordance with Statement of Auditing Standards No. 65 "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the financial position of the Corporation and its subsidiaries as of September 30, 2021 and 2020, and its consolidated financial performance for the three months and the nine months ended September 30, 2021 and 2020, and its consolidated cash flows for the nine months ended September 30, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 "Interim Financial Reporting" endorsed and issued into effect by the FSC.

The engagement partners on the reviews resulting in this independent auditor's review report are Yu-Hsiang Liu and Jia-Ling Chiang.

Except for the following, refer to the summary of significant accounting policy in the consolidated financial statements for the year ended December 31, 2020.

1) Retirement benefits

Pension cost for an interim period is calculated on a year-to-date basis by using the actuarially determined pension cost rate at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant plan amendments, settlements, or other significant one-off events.

2) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax. Interim period income taxes are assessed on an annual basis and calculated on an interim period's pre-tax income by applying to the tax rate that would be applicable to expected total annual earnings.

a. Accounts receivable

The Group allows an average credit period of 30 days (the aging of receivables from sales of goods is based upon the date of examination and acceptance of the goods settlement is monthly or 60 days after shipment date). Refer to Note 28 for credit risk management policies.

The Group applies the simplified approach to providing for expected credit losses prescribed by IFRS 9, which permits the use of lifetime expected loss provision for accounts receivables. The expected credit losses on accounts receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

The following table details the loss allowance of accounts receivable based on the Group's provision matrix.

The Corporation bought farmlands for warehouse at the Jia Xing Section and Quing Shui Section of the Gangshan District in Kaohsiung City. However, certain regulations prohibit the Corporation from registering the title of these farmlands in the Corporation's name; thus, the registration was made in the name of an individual person. The individual person consented to fully cooperate with the Corporation in changing the land title in the future and pledged the land to the Corporation as collateral. As of September 30, 2021, December 31, 2020 and September 30, 2020, the book value of those remaining farmlands recognized as land were NT\$55,433 thousand, respectively.

The Corporation's tandem cold-rolling line in pickling and galvanizing department was idle. The management assessed there was no future recoverable amount. Thus, the Corporation recognized an impairment loss of NT\$231,711 thousand in September 2020. Such impairment loss was recognized in operating costs.

After considering the condition of the future market and the current capacity planning, the Corporation carried out a review of the recoverable amount of part of steel pipe production lines and determined that the carrying amount exceeded the recoverable amount and thus recognized an impairment loss of NT\$535,465 thousand in September 2021. Such impairment loss was recognized in operating costs. The recoverable amount of the relevant assets was determined based on their value in use, and the discount rate used in measuring the value in use was 7.19% per annum.

Additional paid-in capital	<u>\$ 903</u>	<u>\$ 903</u>	<u>\$ 903</u>

In 2009, CSC had transferred its treasury stocks to its employees and subsidiaries. The Corporation recognized a compensation cost and capital surplus of NT\$743 thousand. In July 2011, CSC issued ordinary shares for cash capital. Under the Company Law, CSC should reserve 10% of the stocks for its employees and subsidiaries. The Corporation recognized NT\$160 thousand of compensation cost and capital surplus.

Such capital surplus may be used only to offset deficits.

c. Retained earnings and dividend policy

The Corporation's Articles of Incorporation provide that 10% of the annual net income less any deficit should be appropriated as a legal reserve; a certain percentage should be appropriated as special reserve; the remainder may be declared as dividends or retained as proposed by the Corporation's board of directors and approved in the shareholders' meetings.

In June 2020, the shareholders' meeting approved a resolution to allocate no less than 30% of the distributable surplus every year to distribute dividends. However, if the cumulative distributable surplus is less than 3% of the paid-in capital, it may not be distributed.

The Corporation is in a mature steel industry. Thus, dividends will be appropriated in cash or in stock at an appropriate ratio, with cash dividends to be at least 50% of total dividends.

Under the Company Law, legal reserve should be appropriated from retained earnings until its balance equals the Corporation's paid-in capital. Legal reserve may be used to offset a deficit. If the Corporation has no deficit and the legal reserve has exceeded 25% of the Corporation's paid-in capital, the excess may be transferred to capital or distributed in cash.

The appropriations of earnings for 2020 and 2019 had been approved in the shareholders' meeting in August 2021 and June 2020, respectively. The appropriations and dividends per share were as follows:

	Appropriation of Earnings		Dividend Per Share (NT\$)

The net profit (loss) and weighted average number of ordinary shares outstanding in the computation of earnings (loss) per share were as follows:

Since the Corporation offered to settle the compensation paid to employees in cash or shares, the Corporation assumed the entire amount of the compensation will be settled in shares and the resulting potential shares were included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

Net loss for the nine months ended September 30, 2020 was not included in the calculation of diluted earnings per share because of the anti-dilutive effect.

27. CAPITAL MANAGEMENT

The Group manages its capital to ensure that entities in the Group will be able to continue their operations while maximizing the return to shareholders through the optimization of the debt and equity balance.

28. FINANCIAL INSTRUMENTS

- 2) The balances included financial liabilities measured at amortized cost, which comprise short-term borrowings, short-term bills payable, accounts payable (including related parties), other payables (excluding dividends payable), refund liability, bonds payable, long-term borrowings, long-term bills payable, and guarantee deposits received.

d. Financial risk management objectives and policies

The Group's major financial instruments include accounts receivable, investments accounted for using equity method, other financial assets, accounts payable, short-term borrowings, short-term bills payable, bonds payable, long-term borrowings and long-term bills payable. The Group's financial management department provides service to the business units, coordinates domestic and international financial operations, prepares and analyzes internal risk reports to monitor and manage financial risks related to the operation of the Group. These risks include market risk (including exchange rate risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Group sought to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives was governed by the Group's policies approved by the board of directors, which provided written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits was reviewed by the internal auditors on a continuous basis. The Group did not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

1) Market risk

The main financial risks arising from operating activities are to the risk of change in foreign exchange rates (see (a) below), the risk of changes in interest rates (see (b) below) and the risk of other price (see (c) below).

There had been no change to the Group's exposure to market risks or the manner in which these risks were managed and measured.

a) Foreign currency risk

The Group was exposed to foreign currency risk due to sales and purchases, denominated in foreign currencies. Exchange rate exposures were managed within approved policy parameters utilizing the same currency for accounts receivable and payable.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities and of the derivatives exposed foreign currency risk at the end of the reporting period are set out in Note 32.

Sensitivity analysis

The Group was mainly exposed to the USD. The following table details the Group's sensitivity to a 1% increase and decrease in the New Taiwan dollars (the functional currency) against the relevant foreign currencies. The sensitivity rate of 1% is used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates.

The sensitivity analysis included only the outstanding foreign currency denominated monetary items, refer to Note 32. A positive number below indicates an increase in profit or loss when the New Taiwan dollars strengthens by 1% against the relevant currency.

	USD Impact (Note)	
	For the Nine Months Ended	
	September 30	
	2021	2020
Profit (loss) before income tax	(\$ 12,669)	\$ 11,186

Note: This was mainly attributable to the exposure of outstanding USD cash, accounts receivables, accounts payable and other payables, which were not hedged at the balance sheet date.

b) Interest rate risk

The Group was exposed to interest rate risk because the Group borrowed funds at both fixed and floating interest rates.

The carrying amounts of the Group's financial assets and liabilities with exposure to interest rates at the balance sheet date were as follows:

	September 30, 2021	December 31, 2020	September 30, 2020
Fair value interest rate risk			
Financial liabilities	\$ 3,063,680	\$ 3,074,167	\$ 3,077,842
Cash flow interest rate risk			
Financial assets	560,532	567,017	932,608
Financial liabilities	1,439,914	3,109,674	3,409,076

Sensitivity analysis

If interest rates had been 0.25% higher/lower all other variables were held constant, the Group's pre-tax profit for the nine months ended September 30, 2021 and 2020 would have been lower/higher by NT\$1,649 thousand and NT\$4,643 thousand, respectively.

c) Other price risk

The Group was exposed to equity price risk through their investments in domestic listed shares.

The equity price of the group was evaluated by the closing price of the equity securities on a monthly basis.

Sensitivity analysis

If equity price of fair value through other comprehensive income financial assets had been lower by one dollar, the pre-tax-other comprehensive income, for the nine months ended September 30, 2021 and 2020 would have both been lower by NT\$34,113 thousand, respectively.

2) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Group. As at the balance sheet date, the Group's maximum exposure to credit risk is the carrying amount of the financial assets on the consolidated balance sheets.

The Group made transactions only with the parties with good credit. The goods were delivered after the cash or L/C was received, and the Group did not provide financial guarantee to any company. Accounts receivable were due to time differences of L/C negotiation and there was no bad debt in the recent years; therefore, the credit risk is very low.

3) Liquidity risk

The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. The Group relies on bank borrowings as a significant source of liquidity. The management monitors the utilization of bank borrowings and ensures compliance with loan covenants. As of September 30, 2021, the unutilized credit facility of the Group was NT\$44.5 billion; therefore, there is no liquidity risk or incapacity of financing capital to meet contractual obligations.

The table below summarizes the maturity profile of the Group's financial liabilities based on contractual undiscounted payments:
